So much intelligence, so little performance - Pilar Vergara

Original title: Tanta inteligencia, tan poco rendimiento.

Which resources do families have to face school failure? Too soon, many children are labelled as inattentive, lazy or non intelligent. This guide explains the signs and the solutions available to one of the most frequent real causes: visual problems. Almost 80% of what the child's perceives, understands and remembers depends on the efficiency of the visual system.

The optometrist Pilar Vergara explains the importance of vision in development and in the learning process and exposes the symptoms and treatments that we can find thanks to Behavioural Optometry.

The book also includes real diagnoses and games to practice at home or in the clinic.

Manual for the child's first visual stimulation- Lucila To

Original title: Manual para su primera estimulación visual.

The optometrist and expert in NeuroLinguistic Programming Lucila To guides us through stimulation exercises for the good development of the baby's vision. It includes explanations, pictures for each stage up to the first year and two cutouts to exercise three dimensional vision with illustrated cubes. The book is designed with a cartoon base to remain upright during static stimulation exercises.

Lucila To has created an essential work tool for optometrists, also useful to stimulate the vision of people with neurological damage. Designed to be used both at home and in the clinic, this release is the first publication of its kind in Spain.

Sazialo di baci. Guida pratica per accompagnare il tuo bambino durante lo sviluppo - Iñaki Pastor

Titolo originale: Cómelo a besos. Guía práctica para acompañar a tu bebé en su desarrollo.

Una tabella di marcia per neo genitori, con semplici consigli per guidare la salute e le abitudini del tuo bambino.

Sazia di baci il tuo bambino, goditi la calma di stare insieme, l'inizio del gioco... ci sono insegnamenti che nascono spontanei. Tuttavia, sai che toccare le mani del tuo bebè favorisce l'allattamento? E che un neonato si sente amato attraverso il tatto? Hai notato che più si muove, meglio fissa lo sguardo? Scoprirai che collegamento c'è tra la parola e le mani, o tra l'orientamento spaziale e il portarsi i giocattolini alla bocca.

Il fisioterapista esperto nello sviluppo infantile Iñaki Pastor parla in modo conciso e illustrativo dei comportamenti e degli esercizi che fanno bene al tuo bambino. In questo libro troverai consigli pratici per far sì che tuo figlio cresca sviluppando tutto il suo potenziale.

Approfitta dei suggerimenti di un fisioterapista per gettare le basi di un buono sviluppo.
